

# THE LEGEND

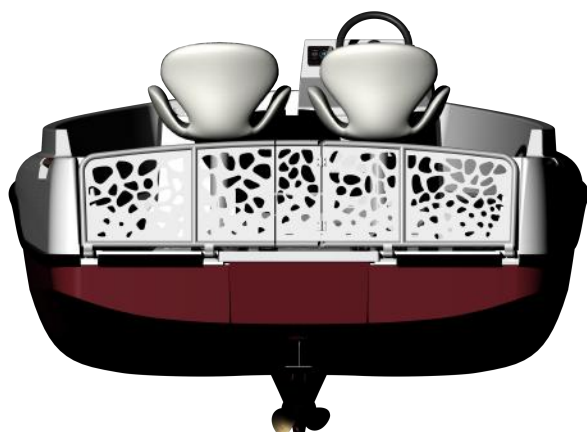

*By Ruban Bleu*

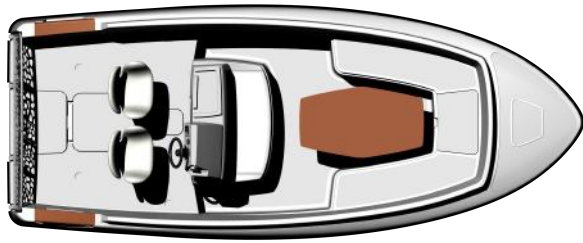

A spacious and stable electric boat, designed to accommodate boaters with reduced mobility

The Legend can take up to 9 passengers including a skipper or passenger with reduced mobility. The skipper has perfect visibility both in terms of the boat itself and the other passengers on board.

## The LEGEND

### Practical and accessible, designed to be inclusive

Inclusivity is key to your boat rental business

We present the Legend - the most spacious boat in the Ruban Bleu range. It offers an essential element to any boat rental business by making the boat accessible to people with reduced mobility. In addition the Legend is the ideal solution to our clients' needs : adjustable motor, safe access to water, conviviality on board (cool box, table, sunbathing area)

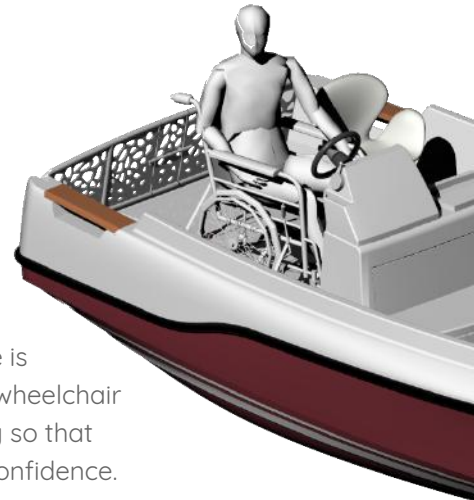

#### SECURITY

The Legend offers extra freeboard to keep children safe. The addition of an aluminium flange at the stern is designed to protect the bather from the propeller while also offering support for the bathing ladder.

#### HELM

The aft bulkhead opens up completely to enable easy boarding for a person with reduced mobility allowing access for a wheelchair. The helm seat is removable and there is space below the console to enable a wheelchair user to position their feet comfortably so that they can helm the boat in complete confidence.
